Snapshot Report

The National Assessment of Educational Progress (NAEP) assesses mathematics in five content areas: number properties and operations; measurement; geometry; data analysis and probability; and algebra. The NAEP mathematics scale ranges from 0 to 500.

Overall Mathematics Results for Nevada

- In 2005, the average scale score for eighth-grade students in Nevada was 270. This was not significantly different from their average score in 2003 (268), and was higher than their average score in 2000 (265).
- Nevada's average score (270) in 2005 was lower than that of the Nation's public schools (278).
- Of the 52 states and other jurisdictions² that participated in the 2005 eighth-grade assessment, students' average scale scores in Nevada were higher than those in 5 jurisdictions, not significantly different from those in 7 jurisdictions, and lower than those in 39 jurisdictions.
- The percentage of students in Nevada who performed at or above the NAEP Proficient level was 21 percent in 2005. This percentage was not significantly different from that in 2003 (20 percent), and was greater than that in 2000 (18 percent).
- The percentage of students in Nevada who performed at or above the NAEP Basic level was 60 percent in 2005. This percentage was not significantly different from that in 2003 (59 percent), and was greater than that in 2000 (55 percent).

¹ Accommodations were not permitted for this assessment

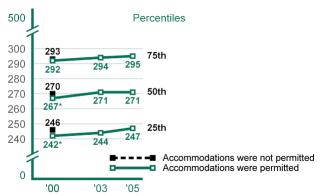

NOTE: The NAEP mathematics achievement levels correspond to the following scale points: Below Basic, 261 or lower; Basic, 262-298; Proficient, 299-332; Advanced, 333 or above.

Performance of NAEP Reporting Groups in Nevada						
	Percent	Average	Percent	Percent of stud	lents at or above	Percent
Reporting groups	of students	score	below Basic	Basic	Proficient	Advanced
Male	51	270	39	61	23	3
Female	49	269	40	60	20	3
White	55	280	27	73	29	5
Black	10	247	66	34	7	#
Hispanic	29	256↑	56	44	10	1
Asian/Pacific Islander	6	281	27	73	30	6
American Indian/Alaska Native	1	‡	‡	‡	‡	‡
Eligible for free/reduced-price school lunch	32	256	56	44	10	1
Not eligible for free/reduced-price school lunch	65	277	32	68	27	4

Average Score Gaps Between Selected Groups

- In 2005, male students in Nevada had an average score that was not found to be significantly different from that of female students. In 2000, there was no significant difference between the average score of male and female students.
- In 2005, Black students had an average score that was lower than that of White students by 33 points. In 2000, the average score for Black students was lower than that of White students by 29 points.
- In 2005, Hispanic students had an average score that was lower than that of White students by 24 points. In 2000, the average score for Hispanic students was lower than that of White students by 24 points.
- In 2005, students who were eligible for free/reduced-price school lunch, an indicator of poverty, had an average score that was lower than that of students who were not eligible for free/reduced-price school lunch by 21 points. This performance gap was narrower than that of 2000 (26 points).
- In 2005, the score gap between students at the 75th percentile and students at the 25th percentile was 48 points. In 2000, the score gap between students at the 75th percentile and students at the 25th percentile was 50 points.

Mathematics Scale Scores at Selected Percentiles

Scores at selected percentiles on the NAEP mathematics scale indicate how well students at lower, middle, and higher levels of the distribution performed.

The estimate rounds to zero.

‡ Reporting standards not met.

Significantly different from 2005.

- ↑ Significantly higher than 2003. ↓ Significantly lower than 2003.
- 1 Comparisons (higher/lower/not different) are based on statistical tests. The .05 level was used for testing statistical significance. Performance comparisons may be affected by differences in exclusion rates across years for students with disabilities (3% nationally in 2005) and English language learners (1% nationally in 2005) in the NAEP samples. Statistical comparisons are calculated on the basis of unrounded scale scores or percentages.
- ² "Other Jurisdictions" refers to the District of Columbia and the Department of Defense Education Activity schools.

NOTE: Detail may not sum to totals because of rounding and because the "Information not available" category for free/reduced-price lunch and the "Unclassifed" category for race/ethnicity are not displayed. Visit http://nces.ed.gov/nationsreportcard/states/ for additional results and detailed information.
